

## **Modulus Technical Note #33 - SuperReport Stock Movement Form** (Amended 17/2/99)

---

The SuperReport Stock Movement form can be used to replace the standard Modulus form if you wish to design your own layout. It must have a Report Code of SR Movement to enable Modulus to find it when required.

Listed below are the variables and arrays which contain values set within Modulus and which can be used in SR Movement. In addition to those listed, all fields in the the [STOCK MOVEMENTS] file can be used in the Header area of the form. Information from the [STOCK ITEMS] file should be loaded into arrays for use in the Body area. Instructions for this can be found on the last page of the general Technical Note covering SuperReport Forms.

References in quotation marks are to the actual text held by a particular variable, usually a vTitle variable. For example, vTitle5 might contain the text Total excl VAT". If the text in a particular vTitle variable does not match your requirements, it is recommended that you remove the variable and replace it with text using the Text tool. References using the format "[ORDERS]Delivery Method" are to specific fields within Modulus.

### Header area

vTitle	Form Title, taken from Movement Type screen in the Data Manager
vTitle1	"Attn"
vDetails	The address of the Company Fr/To, each line separated by carriage returns
vTitle2	"Date" The [STOCK MOVEMENTS]Movement Date field is used to show this information
vTitle3	[MOVEMENT TYPES]Number Name (set on the Movement Type screen in the Data Manager) The [STOCK MOVEMENTS]Type No field is used to show this information
vTitle4	"Account No" The [STOCK MOVEMENTS]Company From field is used to show this information
vTitle11	"Our Ref" The [STOCK MOVEMENTS]Movement Code field is used to show this information
